RackGuard

Made from a flexible, impact-absorbent polymer blend, the RackGuard protects vulnerable rack legs from front, side and scrape impacts from workplace equipment that can degrade safety.

QUALITY & CONFIDENCE
Tested and independently verified by TÜV, all **A-SAFE** products come with the reassurance of being the strongest, most innovative products from the global industry leaders.
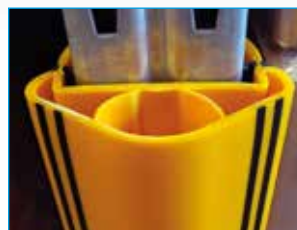

GRIPPED & SECURE
Frictional grip points and a centralising rubber lug ensure the product stays central and secure to any rack leg, while a compression hinge ensures the leg is in a state of constant compression.

VISIBLE & ULTRA-LOW MAINTENANCE
The high visibility yellow makes accident prevention a priority and the non-scratch, non-repaint properties create large maintenance savings.

EASY INSTALL FOR ALL RACKING
A Rackguard Tool Set assists with ultra-fast installation for every rack leg size.

*" Busy warehouse operations like ASDA have a high volume of traffic as well as numerous pedestrians on site at any one time. Therefore, sub-standard safety systems which can harm our workers and cause disruption to this schedule are not acceptable. The products are not only easy to install and adaptable to our ever-changing needs, but require little upkeep or repair and therefore we are finding that **A-SAFE** products are saving us thousands of pounds a year.*

RackGuard

SPECIFICATIONS

Angle of impact		45°	90°	180°
Tested impact energy (Joules)		800	1000	800
Equivalent vehicle weight (kg)		2000	2000	2000
Equivalent vehicle speed (km/h)		3.2	3.6	3.2
Material Properties				
Temperature MEMAPLEX™		-15°C to +50°C		
Temperature MEMAPLEX FR		-40°C to +30°C		
Chemical Resistance		Excellent - ISO / TR 10358		
Fire Rating		HB		
Food Contact		Yes		
Toxicity		None		
Conductivity		No		
Environment				
CO_2 / RackGuard		2.142		
Recyclability		100%		

Terms and conditions apply

DIMENSIONS

600 mm
