

Alerting the public of an emergency situation is now easier and more reliable than ever with Federal Signal's Informer I-HIO and I-UIO radio receivers. Informer units are designed for one-way radio alerting applications.

Informer Radio receivers come in either VHF or UHF-band models. Standard units decode DTMF, single-tone, and two-tone sequential signals (optionally available are units for decoding EAS/SAME or Federal Signal digital protocols). The Informer is capable of generating four separate alarm sounds that can be accompanied by a live voice message.

Informer units include a LED panel that flashes to immediately indicate transmission of an emergency alert. Other features include a 600-Ohm audio output, dual (N.C./N.O.) relay for external control, built-in diagnostics, and an LED test indicator. The receiver can be programmed to disable the "monitor" button in order to prevent end-users or unauthorized persons from listening to local-channel activity.

The Informer I-HIO and I-UIO desktop versions feature an external AC transformer for power, as well as built-in battery backup. All wiring is routed to connectors located on the back of the unit for convenient access.

Informer I-HIOW and I-UIOW receivers are designed to be wall mounted or recessed into the wall. All wiring is contained within the aluminum case, and five pre-punched, easy-to-remove conduit holes are available to facilitate wiring connections into and out of the unit. Informer I-HIOW and I-UIOW receivers include a 115/230VAC power supply pre-wired to internal terminal blocks and a built-in battery backup. These models feature mounting holes for easy top mounting of an optional Federal Signal LP1 Strobe light. Units are pre-wired to accommodate the LP1 Strobe which operates off the Informer's internal power supply.

Informer units are factory programmed for narrow-band operation and come with a one-year warranty (see owner's manual).

#### FEATURES

- Instant alerting and notification for emergency situations
- Rugged metal enclosure with internal wiring
- High output speaker for tone and voice notifications
- Optional EAS/SAME or Federal Signal digital protocols
- Windows<sup>®</sup>-based software for easy programming
- DTMF and two-tone decoding standard
- Desk or wall mounting models
- External audio and control capabilities
- US ETL Listed to UL Std 60065
- Canadian ETL Listed to UL Std 60065 for I-HIOW and I-UIOW

<sup>1</sup> Receiver specifications referenced to TIA/EIA 603

<sup>2</sup> Acoustic Output measured at 10' on axis in an anechoic environment. User configurable soft-tones (approximately 55 dBc).

### HOW TO ORDER

Description Part	Number
VHF high band, 151-174 MHz - wall mount*	I-HIOW
UHF band, 450-470 MHz - wall mount*	I-UIOW
VHF high band, 151-174 MHz - desk mou	nt <b>I-HIO</b>
UHF band, 450-470 MHz - desk mount	I-UIO

There is a programming fee associated with Informers programmed at the factory. Contact your local representative for a quotation. \*Units build prior to mid-2015 do not have battery backup.

# OPTIONAL ACCESSORIES

Description Pa	art Number
Installed EAS	I-EAS
Field installable EAS kit	I-EAS-KIT
AFSK installed	I-FSK
Field installable AFSK kit	I-FSK-Kit
Programming software	I-SW
12VDC Strobe compatible with I-HIO an I-UIO models (can be powered by intern	
power supply)	LP1-012 <u>*</u>
Battery	155191A
*(A) Amber, (B) Blue, (C) Clear, (G) Green or (R) Re	d

### **Optional Signaling Formats**

Federal Signal (MSK) Digital Option 1200, N, 8, 1 Synchronous,1200 Hz mark tone, 1800Hz space tone

Digital Decode Sensitivity <20 dBc SINAD

EAS/SAME Option User programmable to any EAS event codes and up to three (3) location codes EAS/SAME Decode Sensitivity <20 dBc SINAD

A flush mount kit is included for recessed applications as shown.
